In re: CertainTeed Fiber Cement Siding Litigation, MDL Docket No. 2270

To Whom It May Concern,

This letter is written in regards to me being a Member of a Class Action Law suit against CertainTeed Corporation in which I object to the Percent Payable based on the Date of Original Installation.

My husband and I built our custom home with a move in date of December 7, 2007. In researching different sidings, we chose CertainTeed Weatherboard Fiber Cement Siding based on their warranty stating "You can feel confident that you have made a wise decision buying from a company that is an industry leader and stands behind its products with strong warranty protection". "For more than 100 years, the origin of our name continues to be our ongoing philosophy – "Quality made certain, satisfaction guaranteed."

The warranty goes on to say that the fiber cement siding is washable with a mild detergent, will not peel, crack, flake or yellow, and will not cause discoloration. The duration of the warranty shall be fifteen (15) years from the date of the original installation

My objection to the Percent Payable is based on a couple of different reasons. The first time I was aware of a problem with the siding was in August of 2010, in which neighbors happened to stop by and in seeing the yellowing, decided to check the siding a little closer, only to discover that there was also extensive cracking.

Because my husband had passed away in January, 2010, I was not mentally able to deal with the burden of the house siding at this time.

In August, 2013, I had an engineer friend of mine look at the siding as well as a claim form from CertainTeed I had downloaded from the internet. He did an assessment of the siding and thus helped with completing the paperwork.

Based on the fact that I did not move into the house until December 2007, I would certainly think that would not be counted as an entire year as outlined in the Percent Payable. In addition, because the cracked/yellowed siding was not discovered until August, 2010, does not mean it did not exist previously; therefore, another reason the Percentage Payable should not apply to my home.

In addition to the objections stated above, I will not be asking to appear at the Final Approval Hearing to discuss my objections and hope this letter will suffice in my place.

Copies of all paperwork originally submitted to CertainTeed Fiber Cement Siding Litigation at BMC Group, PO Box 2004, Chanhassen, MN 55317-2007 are also being submitted to , The Court, Class Counsel and CertainTeed Corporation. All original photographs (50) were previously submitted to CertainTeed Fiber Cement Siding Litigation.

The only structure affected is my custom built home with attached garage.

 Total square feet of each structure on the property 5216 sq ft
 Measurement of the footprint of the property 1/2 acre
 The number of stories the property has 2/both house + Attached garage

Note: You may submit measurements for each wall to assist the Claims Administrator's determination of the measurements. Claimants who do not provide such detailed measurements may not obtain review of the measurements by the Independent Claims Reviewer.

CONDITION OF THE SIDING:

Describe your specific concern with the Siding and specify the areas of the siding where those concerns are manifested:

The siding on my house has extensive cracking on every side of the house. It is not spotty, it is everywhere. It has a lot of fading, on all sides of the house. There is also extensive warping & shrinkage as shown in pictures.

PHOTOGRAPHING THE DAMAGE:

In addition, provide photographs using the measurement scale on this form. The scale is located on page 5 of this form. The settlement defines Qualifying Damage in part by reference to the amount of shrinkage, delamination, cracking and warping or bowing. The shrinkage refers to the joint where the ends of two boards meet on a wall or where the board abuts or ends against a window frame, door frame or trim. Use the "3/16" scale mark to measure shrinkage at the point where boards meet. Use the "5/16" scale to measure shrinkage at places where windows, door or trim meet the boards. The "1/2" scale mark on this form should be used to measure the warping and buckling of the board. To photograph cracking or delamination you do not need to use the scale, but only take pictures of the cracked or delaminated portion of the siding.

The easiest way to see these scales is to hold the scale (or a photocopy of the scale) directly adjacent to the area of shrinking or warping/buckling and take a picture. If it helps, tape the scale to a firm surface, like a piece of cardboard. You can also use a ruler or any other clearly marked measuring device. You can ask a local contractor to assist you.

REPAIR / REPLACEMENT HISTORY:

Have you repaired or replaced your Siding? ☐ Yes ☒ No

If you answered yes, describe the repairs made below, including the date of repair:

You must provide credible evidence (a) that the siding that is the subject of the claim is CertainTeed Fiber Cement Siding; (b) of the quantity of Siding; (c) of the date of installation; and (d) that the Siding meets the criteria for Qualifying Damage under the Agreement.

IMPORTANT: Each submitted document must be labeled with the assigned Claim Number and Claimant Name. Photographs must also be labeled to identify the area shown.

PLEASE CHECK OFF EACH BOX BELOW TO INDICATE WHETHER YOU ARE ENCLOSING THE DOCUMENT(S) DESCRIBED BY THE LANGUAGE NEXT TO EACH BOX. YOU MAY HAVE DOCUMENTS THAT SATISFY MORE THAN ONE BOX; IF SO A SINGLE COPY OF THE DOCUMENT IS SUFFICIENT.

☒ Documentation of product identification.

Acceptable documentation, would include reliable and contemporaneous documentary proof of purchase and installation of the Siding, such as an invoice from a third party and evidence of payment; or a prior communication from CertainTeed (e.g., where a prior warranty claim has been made), which confirms that the Siding on the structure is CertainTeed Fiber Cement Siding. In some cases, photographs of the siding may be sufficient to establish that the Siding installed on the property is CertainTeed Fiber Cement Siding. Bids and estimates are not acceptable.

☒ Documentation of date of installation:

Documentation that may show the date of installation would include: a dated invoice for installing the Siding from a third party; a certificate of occupancy or final building inspection; or a Building Permit. The Building Permit should be available by contacting your local township office. Bids and estimates from third parties for siding installation are not acceptable.

☒ Documentation of quantity of Siding panels.

Acceptable documentation would be the original receipt showing the date and quantity of materials purchased, or the contractor's invoice at the time of application. Photographs of the building sufficient to establish the size of the area covered by Siding may be accepted if other documentation is not available.

☒ Documentation of the condition of the Siding.

Please submit photographs in each category specified below.

In general, try to make sure that the photographs are sufficient to establish the condition of the Siding in sufficient detail and quality to allow the Claims Administrator to evaluate whether and how much of your Siding has Qualifying Damage under the Agreement, and to determine the nature and extent of any affected areas.

☒ **Sufficient** photographs to show the entire structure (front and back) from the ground level, and from a distance sufficient to show the entire structure.

☒ **A minimum of two** photographs of each wall of Siding showing the condition of the Siding. Such photographs should include close-up pictures of the problem.

☒ **One** photograph showing the building number on the building or on a mailbox in front of the building.

☒ **One or more** photographs showing a close-up of the problem.

INSPECTION:

If the property must be inspected, do you wish to be present for the inspection? ☒ Yes ☐ No
